

DISTRIBUTION AND VMI WAREHOUSING SOLUTIONS

SUPPORTING MANUFACTURERS WITH GLOBAL
EXPERTISE IN VMI WAREHOUSING

Expeditors' extensive global coverage provides shared user warehouse capacity and fulfillment centers. We utilize our technology suite to provide access to warehouse space and uphold global standards to meet the automotive industry's operational specifications.

Our value-added solutions combine inventory management, repacking, and labeling. This level of visibility at part level and ASN supports a variety of Vendor Managed Inventory (VMI) business models.

OUR SOLUTION

The automotive & mobility sector requires flexibility, agility, and capacity. Our global distribution provides access to local expertise close to manufacturing sites.

DISTRIBUTION AND VMI WAREHOUSING SOLUTIONS

ADVANCING YOUR SUPPLY CHAIN

How does this work?

Our teams manage your entire supply chain using a single global platform. A manufacturer's inventory management needs capacity and control close to production plants.

Value-Added Solutions

Global footprint and shared user warehouse capacity

Proximity to major manufacturing locations

A full suite of services including pick, pack, and re-labeling

Order preparation, QC processes, inspection, and returns processing

Serial Number, batch, and part-level controls

Global Capacity and Industry Knowledge

Integrated inbound to manufacturing solutions

Returnable packaging management

ASN management and EDI connectivity

Global web-based portal to access real-time inventory data

Customer Enhancement

Control VMI inventory within single or multiple locations

Designated customer service teams

Customized KPI metrics and analytical dashboards reporting

Sustainable solutions ISO 9001, ISO 14001, NQC Automotive certified

PROGRAM OPPORTUNITIES

Expeditors VMI Warehousing Solutions equip manufacturers with a range of inventory management options. We provide an extensive network with a range of shared user capacity, ideally situated to the final manufacturing plants. Our processes are aligned with Just In Time methodology. Our teams are trained in continuous improvement techniques that demonstrate efficiency and cost control.

Integrated end-to-end inbound to manufacturing solutions • Seamless information flows in real-time • Global reach and local expertise
