LCL Express	17 Days	18 Days	19 Days	20 Days

*Transit times are CFS to Door and subject to change.

Cost-effective: LCL Express is faster than traditional LCL and less expensive than air freight service. This service offers a cost-effective alternative for shipments that are urgent but do not warrant full air freight costs. It helps to manage ever increasing transport costs while maintaining supply chain flow and efficiencies.

Full coverage: LCL Express is available from multiple Europe origins to most US door destinations.

Secure: LCL Express moves within the existing Expeditors ocean network. Loaded and managed from origin to door by Expeditors employees.

Consistent and Reliable: LCL Express moves via ocean in existing, dedicated weekly consolidated ocean containers to the East Coast and is immediately moved out for delivery to your door location using premier LTL carriers.

Traceable: LCL Express moves as an LCX shipment within the Expeditors system allowing the cargo to be tracked and monitored as LCL Express via the EXP.O NOW platform.

Bonded facility: In-bond services available for fast, easy delivery to an FTZ or other bonded facility.
