

Packaging Solutions Workshop

Navigating the complexities of packaging can be complicated, which is why Expeditors developed a unique Packaging Workshop program to optimize your entire packaging process. We understand the importance of efficient and effective packaging, and through our extensive TC Room Network, we condition boxes, load products, and even facilitate recycling and reuse at destination, offering a complete end-to-end solution.

This program is crucial for shippers seeking to improve their shipping methods, providing a valuable opportunity to optimize processes, validate their packaging, and leverage our TC Network's capabilities.

HOW IT WORKS

Our Packaging Workshop program is conducted on a customer-requested basis, we bring our expertise directly to your location, offering a hands-on packing demonstration. Our specialists will collaborate with you to discuss optimal packaging strategies and visualize how they would integrate within your warehouse. We'll narrow down the packaging options, allowing you to have an intimate, first-hand discussion with our representatives and a clear understanding of each solution.

**Customers must have required volume of product for this service*

KEY BENEFITS

There are a vast number of benefits that this program can provide, here are some examples of how our Packaging Workshop Program can improve your packaging process.

- Sustainability
- Cost-Reduction
- Product Integrity (Product Quality)
- Visibility of Set-Up
- Continuous Improvement
- Process Optimization
- Showcase Evolving Technology
- LTL Program
- Packaging Validation
